

INSPECTORS SEIZE

SEALS IN CHINA.

San Francisco Customs Find Regarded as Most Important in History of the Port.

PLACED IN SAFE DEPOSIT.

Tablets of Jade From the Temple in Peking Found in the Baggage of Ninth Infantry.

REPUBLIC SPECIAL. San Francisco, July 12.—Five imperial jade seals of the Chinese Government and twelve jade sacred tablets from the imperial temple in Peking have been seized by the customs officers at the transport dock. The seals and ten of the tablets were part of the baggage of First Lieutenant John B. Schofield of the Ninth Infantry, and the other two tablets were in the possession of A. Hume, who returned on the transport Sherman. The seizure is regarded by the local customs officials as one of the most important in the history of this port. It was evidently the intention of both Schofield and Hume to get the jade through the Custom-house without discovery, for it was not in the manifest of the ships nor declared as part of the baggage.

How Seals Were Found. Lieutenant Schofield returned on the transport ship with his company, M, of the Ninth Infantry, and took part in the advance on and capture of Peking by the allied forces in 1900. That campaign was memorable for the tremendous amount of loot seized by the officers and men of the allied forces, although it was the general impression at the time that the Americans had not been as eager and persistent in their looting as the others. Schofield says that he purchased the jade seals and tablets from a Chinese, who sold them to him for \$20. The Chinese was very mysterious in his actions and anxious to sell. He had packed it away in the same box that it was sent in, taking it to Manila, where it remained for about a year. When the Lieutenant was apparently the most unscrupulous man in the crowd about the baggage, he was seen to take away without a protest and went on directing the examination and transfer of the company baggage.

The seizure was made by Inspector Victor J. Lindquist, given a clear explanation, the customs inspectors were quickly without the tip of the jade, and attention to the baggage of the Ninth Infantry, for it was thought a great deal of loot would be found that came from China. The Chinese Government has offered large rewards for the recovery of certain articles which disappeared during the foreign occupation of Peking, and for these articles foreign governments had been asked to return.

Proper Authorities Notified. The sacred tablets from the imperial temple were considered the most important. Each tablet is a history of a reign of one Emperor and is of enormous value, both from points of view of art and as they have never been duplicated. Both the tablets and seals are of the purest jade, flawless and polished. The carving is evidently the work of an artist. The seals are heavy, about five inches square and two inches thick, and have elaborate handles in the form of dragons with five toes, which indicates that they belong to the imperial family. The tablets are about one foot long by four in width and half an inch thick. They are made of yellow and white jade, and the tablets of yellow are protected by silk mats of yellow, another evidence of their imperial character.

The jade was taken to the office of Deputy Surveyor St. John, who placed it in a safe pending a decision of the Treasury Department, which will not be made until the end of the month.

MYSTERY OF EMPTY BEER KEG. Small Barrel Is Addressed to Mayor Low of New York.

REPUBLIC SPECIAL. New York, July 12.—A half barrel, known in New York as a "beer keg," is the subject of a mystery. How the keg got into the City Hall is a mystery. "I did not shoulder it in. Then again what would I be doing with an empty keg? What am I going to do with it? Why, the keg is addressed to Mayor Low."

None of the witnesses explain how the beer keg was smuggled into the building. An examination of the keg after the Sherlock Holmes method discloses the following facts:

That the keg is old and battered. That the keg has been removed from some brewery, because the name of the owner was erased and, further, rings of bright red paint were painted around the edges of the keg and the hoops.

On the top of the keg was this inscription:

SPOKE IN THE HOME
Drop a nickel in the slot.

A metal plate was sunk into the bung hole of the keg with an opening for coin. Tacked on the other end is a tag addressed to Mayor Low, at the City Hall, with a request that the keg be allowed to stand in the Market office as a token of the respect of the citizens of New York for the broken-down "sports," especially those who are known as "jokers."

"From the Sherlock Holmes work I have done in this matter I have become convinced that it is the work of a professional burglar. The fact that the keg was found in the City Hall, showing that it was not a joke or a broken-down 'sport,' is a fact of great importance."

Major Low said junior Keese, Commissioner of the City of New York, said that the keg was found in the City Hall, showing that it was not a joke or a broken-down 'sport,' is a fact of great importance.

PRIEST ACCEPTS NO PURSE. All Father Anacletus Will Take Is Good Wishes.

REPUBLIC SPECIAL. New York, July 12.—Although very poor, Father Anacletus da Rocca, who has been pastor of St. Anthony's Church, has refused to allow a donation of a purse as a testimonial to him as a token of the love and esteem which the people have for his faithful services for nearly thirty years.

Father Anacletus, who is affectionately called in the parish, is a man of great goodness of heart. He has been called to the rectory to replace Father Anacletus, who has been called to the rectory to replace Father Anacletus, who has been called to the rectory to replace Father Anacletus.

Father Anacletus, who is affectionately called in the parish, is a man of great goodness of heart. He has been called to the rectory to replace Father Anacletus, who has been called to the rectory to replace Father Anacletus, who has been called to the rectory to replace Father Anacletus.

WORK ON WHITE HOUSE. Excavation Has Been Completed for the New Office Building.

REPUBLIC SPECIAL. Washington, July 12.—Workmen have completed the excavation for the foundation of the new office building which is to be erected west of the White House for the accommodation of the President and his cabinet.

All the floors have been torn out of the first story of the White House. The wooden beams are being replaced with steel, and the new hardwood floors will be laid. The floors on the second story of the building will also be rebuilt entirely before the workmen begin the decoration of the interior of the White House.

ALTERATION SALE

The Meyer Store is to be made roomier and better. Carpenters are already at work. Departments are being moved and prices are being greatly reduced to make room and clean out stock. The sale grows greater day by day. Tuesday or any other week-day is as good a shopping day as Monday at The Meyer Store. Thousands of St. Louis people now say The Meyer Store sells better goods for less money than ever was known in St. Louis.

STORE CLOSING EVERY DAY AT 5 O'CLOCK.

SALE OF CORSETS.

Caused by removal of department from third floor to second floor, the entire stock of corsets is being sold at \$7.50 ribbon girdles this sale at \$4. \$2.50 brocade corset sale at \$1.75. Colored and white Corset sale at \$3. \$10. Silk Court Corset sale at \$5.75.

TWO BOYS' SUITS FOR THE PRICE OF ONE.

The Meyer Store's entire stock of All-Wool Summer Suits for Boys, 3 to 10 years, is now placed on sale in 3 lots. Lot No. 1—All Suits \$1.50 to \$1.85. Lot No. 2—All Suits \$1.50 to \$1.85. Lot No. 3—All Suits \$1.50 to \$1.85.

READY-MADE SUITS, SKIRTS, WAISTS.

Space is being reduced to make room for other departments, which space is being remodeled. The moving has caused an upheaval of stock, and this week's great sale is the result of a gathering together of all the incomplete assortment.

Odd Lot \$4 and \$5 Summer White Waists, \$1.50. Odd Lot \$2.50 and \$3 Summer White Waists, \$1.50. Odd Lot \$2.50 and \$3 Summer White Waists, \$1.50. Odd Lot \$2.50 and \$3 Summer White Waists, \$1.50.

MUSLIN UNDERWEAR.

Alteration improvements necessitate moving 1-2 the stock to the second floor, where this special sale is to be held.

THIN WOOL DRESS GOODS.

81 English Tansie Thin Stripes, \$3c. 81 English Tansie Thin Stripes, \$3c. 81 English Tansie Thin Stripes, \$3c. 81 English Tansie Thin Stripes, \$3c.

POWER OF THERMITE, HE

SCIENTISTS CLAIM THAT IT WILL MELT IRON AND STONE INSTANTLY—UNDER ITS BLAZE GRANITE CAN BE MADE TO FLOW LIKE WATER—CHEMISTRY'S STARTLING DISCOVERY.

The hot slag strikes the upper part of the crucible, it is to such a degree that the union is instantaneous. A blow or two with a hammer separates the slag from the upper part of the now solid rail, and the operation is complete.

"It is remarkable that, though the contents of the crucible flows out at a temperature little below 1,500 degrees Fahrenheit, the outside of the crucible may be held in the bare hand almost immediately, because the development of the heat is so rapid to the great surprise of those who are in contact with the molten mass longer than it remains in the crucible."

"So great is the heat that the rail would still be hot to the hand at the end of eight minutes if the molten mass were allowed to remain undisturbed. When the molten mass of the invention is shown by the fact that the crucible is so hot that it is impossible to hold it in the bare hand immediately, because the development of the heat is so rapid to the great surprise of those who are in contact with the molten mass longer than it remains in the crucible."

"After a series of careful experiments, the iron was found to be thoroughly mixed in a mass of ordinary slag, and the molten mass of sodium was placed on the mass. There was a bright flash, followed by a glow and gentle flame from the crucible, and all was over."

"The interior of Mont Pelé, where fire blast destroyed St. Pierre in a moment and crumbled its building into dust, would be compared with this temperature of 4,000 degrees Fahrenheit. The interior of Mont Pelé, where fire blast destroyed St. Pierre in a moment and crumbled its building into dust, would be compared with this temperature of 4,000 degrees Fahrenheit."

"The human mind," says a well-known scientist of this city, "can form no appreciative conception of what such a temperature means. It would melt the most refractory rocks and cause them to flow like water."
